

A guide to...

Mobile APN.

we are **daisy.**
www.daisygroup.com

If you are experiencing issues with your data browsing on your mobile handset, please follow the below steps:

1. Ensure mobile data is switched on the handset

This can be checked within the settings on your handset.

2. Ensure the mobile APN settings are correct

iPhone: please go to settings > cellular, or mobile > cellular data options, or mobile data options > cellular data network, or mobile data network, then please add the APN Settings in all sections you can.

Android: please go to settings > mobile networks > access point names > click 'Add', fill in the required fields with the below data, click 'More' and then 'Save'. Then make sure the APN you've added is selected.

APN settings on Page two dependent on mobile network.
