

Our 2018 Gender Pay Gap Report

Daisy IT Managed Services Ltd

Daisy aims to be a diverse and inclusive business and we believe our success depends on our people. Capitalising on what is unique about individuals, and drawing on their different perspectives and experiences, will add value to the way we deliver service to our customers and partners.

By accessing, recruiting and developing widely-diverse talent irrespective of gender we can gain an insight into different markets and generate greater creativity in anticipating customer needs.

We are constantly striving to create a productive environment, representative of and responsive to different genders, where everyone has an equal chance to succeed and we welcome the introduction of Gender Pay Gap reporting.

The summary tables below show:

- Our median and mean gender pay gap (based on hourly rates of pay at a snapshot date of 5 April 2018) and bonus and commission pay gap (based on bonuses paid over a 12 month period ending 5 April 2018);
- The gender distribution across 4 equally divided quartiles and
- The proportion receiving bonus or commission pay (based on bonuses paid over a 12 month period ending 5 April 2018).

We know we have some work to do to reduce the gender pay gap but we are committed to providing a fair workplace for all of our colleagues. Like many IT/telecommunications businesses, our gender profile means that we have a pay gap which reflects the number of men in senior roles and STEM roles compared to the number of women. We have 3 times more men than women in the business.

2017		2018	
Male	Female	Male	Female
27%	20.8%	27%	19.1%

Commentary on the figures including comparison to 2017:

- On average men are paid 38.4% more than women
- The median hourly rate for men is 37.6% higher than for women
- This business was hived up into Daisy Corporate Trading Services Ltd as at 1 January 2019
- Whilst the mean and median figures show a negative trend when compared to last year we anticipate that recent changes, particularly at senior levels will help to reduce our gender pay gap
- The split of quartiles and proportion of males and females receiving a bonus remained constant

I declare that our data has been calculated according to the requirements of the Equality Act 2010 (Gender Pay Gap Information) Regulations 2017.
